Pau: Electronic medical records done right

Abstract—TODO: abstract

I. Introduction

Medical records began going electronic in the mid 1960s [**?**] and for good reason. Electronic medical records (EMR) are often viewed as superior to paper or hard copy records because EMR's are more portable, more resilient and more accessible. In addition, modern hospital infrastructure is set up such to support EMR systems and provide easy of use for healthcare providers. While EMR's resulted in massive improvements to healthcare, issues with respect to access to EMR data appear to be a bottleneck for further healthcare benefits.

II. Pau

A. What is Pau

B. Pau as a Solution

III. Tree Notation

This citation will probably be used here somewhere [1].

A. Tree Language

B. Tree Grammars

IV. Implementation

V. Why Pau

VI. Conclusion
